NADEER HOME HEALTH CARE INC.

Providing High-
Quality Care

WHO WE ARE

Nadeer Home Health is a Minnesota-based professional Home Care company that provides services to seniors and other individuals in the comfort of their homes. We are dedicated to offering in-home care to your loved ones in the privacy of their own homes. Quality and service are the cornerstones of Nadeer Home Health.

Our qualified, dependable caregivers are available year-round, 24 hours a day, 7 days a week. You can depend on our caregivers to improve the quality of life for you and your loved ones by meeting a variety of physical and emotional needs.

Nadeer Home Health provides caring and courteous caregivers with trusted home care that assists with daily living activities. Both of our caregivers undergo thorough national background checks, giving you peace of mind when they enter your home. Our diverse care team contributes to our quality and high level of client care.

OUR SERVICES

INTEGRATED COMMUNITY SERVICE

Services that provide support and training in community living service categories to adults age 18 and older who reside in a living unit of a provider-controlled ICS setting (e.g., apartment in a multi-family housing building). ICS can be delivered up to 24 hours per day in the person's living unit or in the community.

PERSONAL CARE SERVICES

Many of our elderly and disabled clients are capable of bathing and taking personal treatment for themselves. Knowing that a professional caregiver is on hand to provide support and protection monitoring offers the client and his/her family additional peace of mind.

RESPIRE CARE

The constant stress experienced by the primary family caregiver can lead to conflict between them and other family members. When the burden of the family caregiver is relieved by the use of in-home healthcare, we frequently see a significant improvement in family relationships. We are here to ease those burdens.

RECREATIONAL ACTIVITIES

Physical and mental stimulation is essential to feeling your best. Independent caregivers encourage our clients to pre-planned activities and introduce new activities that are suitable for them.

COMPASSIONATE CARE

Social stimulation is therapeutic in addition to the ensuring independence of our clients. Our caregivers are committed to ensuring that each individual is encouraged to continue their activities in a respectful manner.

MEDICATION REMINDERS

To prevent potentially harmful medication mismanagement, the caregiver will advise the person to take their medication, help with pre-measured medication packages, prescribe medication as appropriate, and report side effects.

MEAL PREPARATION

Our caregivers will assist you to prepare a healthy, well-balanced meal, as well as clean up. Our nurses and administrators will collaborate with the client's family and other healthcare providers to prepare meals that are tailored to their individual needs.
